

Infinite Loopers

Emoji Translator

Our Approach

- ❖ Emoji meanings vary with context, so why not let the user specify it directly?

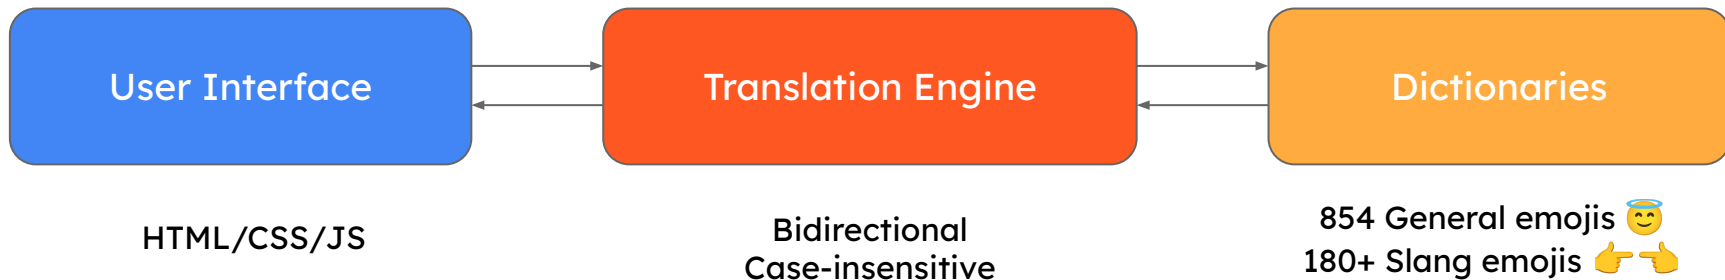

* Formal/descriptive words

* Modern internet slang

Technical Architecture

Serverless !!!

LIVE DEMO TIME!

[Demo Link](#)

Quick Examples

General Mode:

"I love watching fire emojis!!!" → "I ❤️ 👁️ 🔥 emojis!!!"

"cool music facts" → "🧊 🎵 100"

Reverse Translation:

"❤️ 🕶️ 🎵" → "love sunglasses music"

Slang Mode:

"that's sus and cap" → "that's 🤔 + 🙄"

"so lit, I'm simp" → "so 😄, I'm 🥰"

Our Team Workflow

 Everything lives on Github

- Code
- Documentation
- Issues
- Decisions

 Our PR Flow

1. Create feature branch from `main`
2. Develop and test locally
3. Open PR with clear description
4. Automated CI runs tests
5. Code Review Required
6. Merge after approval

Reflection

Importance of Communication Strategies

- Slack: Asynchronous/Quick tag ups
- GitHub: Development
- Team Meetings: Sync, Decision Making

Lessons Learned

- Defined roles (and rules) increase efficiency
- Planning ahead as a team saves time later
- Compromising on different working styles
- Defining team-wide Git practices (oopsies with merge conflicts + duplicate repos)
